

Execution Instructions

Nikhil Jangamreddy (2018csm1011)

February 22, 2019

1 Required Tools

- Numpy
- Matplotlib
- Python3
- Scipy

2 Execution Steps

To execute code in /code directory run following code :

python3 answer.py

Or

python3 answer.py > result.txt

In case of first command results will be displayed on terminal. In case of second command results will be stored in result.txt file.

Plots generated are stored in **figures** folder.
