Execution Instructions

Nikhil Jangamreddy (2018csm1011)

today

1 Required Tools

- Numpy

- Matplotlib

- Python3

2 Execution Steps

To execute code in /code directory run following code :
python3 answer.py
Or
python3 answer.py > result.txt
In case of first command results will be displayed on terminal. In case of second command results will be stored in result.txt file.
Plots generated are stored in **figures** folder.
